

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph after page 24, line 19 of the specification:

Fig. 5 is a cross-sectional view of a capacitor 1 produced in accordance with the method of the invention, including, as one electrode, an electric conductor 2 having formed on the surface thereof a dielectric layer 3 and, as the other part electrode, a semiconductor layer 4 formed on the electric conductor. As shown in the enlarged view, feather-shaped fine protrusions 5 and other fine protrusions 6 are formed on the dielectric layer 3.
